

# Performance Requirements

The Coachmen have very few specific performance requirements relative to venues and related operations. However, below are the group's common requirements:

- At minimum, a 16X12 ft. performance area, or at least enough room for 4 individuals to perform comfortably with 4-6 ft. extra space behind on-stage equipment.
- At least 2 electrical outlets at or readily near the performance area.
- Entry to the venue at least 2 hours prior to performance for setup and sound checks.
- Provided with an on-site or a readily accessible contact at the venue during the 2 hours preceding the performance.
- Room for parking a 24 ft. recreational vehicle connected to a 8 ft. trailer within a short walking distance of the venue.
- To be notified of any unique performance requirements at least one week prior to performance (i.e., song requests, special arrangement of a service, etc.).
- To be notified of anything specific to do or not do during the performance at least one week prior to performance (e.g., gospel music only, no comedy, etc.)
- To be notified of any changes to the original agreed-upon length of performance at least one week prior to the performance.
- For venues that will be providing sound for The Coachmen:
  - 4 vocal microphones (John Lane vocal should slightly exceed other vocals in terms of the set channel volume, and Bob Campbell's microphone should be provided with higher low-end / bass frequencies than the others).
  - Ability to connect a digital keyboard and an acoustic guitar to the house system via ¼ inch or XLR cable (Coachmen can provide direct boxes).
  - 4 on-stage monitors set with a mix as represented by the house sound, including keyboard and acoustic guitar in the mix.

As always The Coachmen are flexible in terms of these requirements. For any questions or concerns please contact the group directly to discuss:
